We will be happy to quote on larger quantities!

Artwork info for Printing Full color Table Throws

Due to the nature of dye-sub printing, we can not guarantee perfect color match. Colors will be matched to PMS or a printout as closely as possible.

IS YOUR ART PRODUCTION READY?

This means that we do not have to make ANY changes or additions. This includes even small changes such as typesetting, or putting files together. If changes are required, the charge will be \$90.00 per hour, with a one hour minimum.

Do you have files that we can use?

We can work from Photoshop, Illustrator or FreeHand files. We will accept Macintosh and PC files.

WHAT RESOLUTION SHOULD I SEND?

Ideal resolution is 100 dpi at OUTPUT SIZE. Our minimum requirement is 50 dpi AT OUTPUT SIZE, this is optical, not interpolated. (Example: a 4"x5" image should be at least 1200 ppi in order to achieve 50 ppi at 8"x10".) If you are sending a vector image, resolution is not a factor. Resolution is very important to printing a good image. It is the number one reason that artwork is not acceptable. Please contact us if this information is not clear.

WHAT SHOULD I KNOW ABOUT COLOR?

For spot color provide us with PMS color matches or a color print that has acceptable color. Send raster digital files in the CMYK format.

WHAT ABOUT TEXT AND GRAPHICS TOGETHER?

We prefer that you use text from a vector program. This would mean that you will place (import) raster images into Illustrator or FreeHand (do not embed). If you must use raster text, make sure that you create it at the final size. Raster text that has been enlarged will lose clarity.

If you are sending us vector text (from Illustrator or FreeHand) make sure that you turn it to outline format. (In FreeHand, convert to paths; in Illustrator, create outlines.) Text is the number two reason that artwork is unacceptable. Please call us if this information is not clear.

HOW DO I GET ARTWORK TO YOU?

Please see our page "sending files"
